REJECTED

Risk: **Very High** | Confidence: **95%**

After carefully evaluating the loan application from Youssef Khelil, I have made the decision to reject it due to extremely high risk factors, including a very high fraud score of 100% detected by our machine learning model, which suggests potential manipulation. This, coupled with a significantly high debt-to-income ratio of 83% and a limited credit history, warrants a cautious approach to minimize potential financial losses for the institution.

1. Applicant Information

4. Validation Results

Validation Status	FAILED
Issue	Names mismatch: form='Youssef Khelil' payslip='Y. Khelil' bank='Youssef Khelil'
Issue	Income mismatch: declared=500000.0, gross_salary=45000.0 (>10% difference)
Issue	Monthly repayment (416667) exceeds 50% of total income (500000)

5. Fraud Detection

Status	FRAUD SUSPECTED
Fraud Score	100%
Threshold	40%
Signal	Income gap: declared 500,000 vs detected 45,000 (1011% difference)
Signal	Name mismatch across documents
Assessment	This individual has been flagged for fraud due to a high fraud score (100%) that exceeds the threshold of 40%, as a result of significant discrepancies between declared and detected income (1011% difference) and a name mismatch across different documents. Additionally, the address_mismatch and low doc_auth_score suggest further irregularities.
